**SUBMISSION OF SUBSTITUTE TRANSLATION, SUBSTITUTE AMENDED  
SPECIFICATION AND SEQUENCE LISTING**

Commissioner for Patents  
Washington, D.C. 20231

RECEIVED  
AUG 20 2002

Dear Sir:

OFFICE OF PETITIONS

On October 11, 2001, Applicants petitioned for suspension of action in the above-captioned application, pursuant to 37 C.F.R. §1.103, in order to allow Applicants to provide a substitute translation of the application. Submitted herewith is a substitute verified translation of the application (**Appendix A**). Applicants request examination of the above-referenced application be resumed.

Upon reviewing the translation, Applicants note that the format of the specification was such that it did not comport with the specification formalities required of United States Patent Applications. Namely, the specification did not contain the appropriate headings as suggested in MPEP §601 for "Summary of the invention", "Brief Description of the Drawings" and "Detailed Description of the Preferred Embodiments" and the "Abstract" was titled "Summary." The parent German language application made

addition, the present application contains amino acid sequences, in order to comply with 37 C.F.R. §1.821 the translated specification is required to make reference to the sequence identifiers (37 C.F.R. §1.821(d)). Thus, there were a number of amendments to the specification in order to make the specification conform to United States Patent Office practice, for the purposes of clarity, rather than presenting such amendments by way of a preliminary amendment, applicants provide herewith a **substitute specification (Appendix B)**. Applicants submit that the substitute specification does not contain new matter.

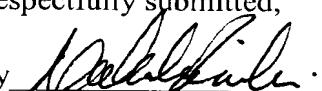

Also attached herewith are the sequence listing, diskette and statement regarding the sequence listing as required under 37 C.F.R. §§1.821-1.825.

Should the Examiner have any questions regarding this submission, Applicants invite the Examiner to contact the undersigned representative.

Dated: August 14, 2002

Respectfully submitted,

By

Nabeela R. McMillian
